

A black handheld electronic device, possibly a PDA or a rugged smartphone, is shown against a blue background. The device has a rectangular screen in the center, a small antenna on the top edge, and four circular buttons or sensors at the corners. Below the screen, there are several green indicator lights. A white rectangular box is overlaid on the screen with the text "label location". A metal ruler is placed horizontally below the device and vertically to its left for scale. The vertical ruler shows markings from 1 to 20, and the horizontal ruler shows markings from 1 to 24.

**label location**
